

Hosting & Migration

Providing organization to securely get at the right data sooner

Whether you are seeking to

- seamlessly migrate existing data from a legacy vendor or platform while maintaining coding decisions
- host data in a Tier III SOC certified data center
- develop client-specific workspace templates
- effectively meet goals for small, medium, and large scale matters

our team can guide you step by step.

Wide level of experience and diverse perspectives

- Team includes administrators certified in respective technologies and various hosting platforms, including Relativity; Nuix; ClarVergence 4, 5, and 6; iCONNECT; Discovery Radar; Catalyst; Equivio; Enterprise Vault; Discovery Accelerator; RingTail; Clearwell; and more
- Diversified team with prior vendor, law firm, and software developer experience
- Dedicated migration team with experience handling unique data types and formats

Scalable solutions to suit any matter

- Scalable and flexible to securely meet your needs
- Experience handling matters of all size – from multiple GBs to hundreds of TBs
- Infrastructure equipped to provide seamless access and quality performance 24/7

Security is a top priority

- Tier III data center with the following certifications
 - SOC1 Type II

Second Requests

Strategic Advocacy

- SOC2 Type II
- SOC3 Type II
- ISO-27001
- Repeatable and defensible data handling processes
- Standard operations management practices

Migrate with ease

- Dedicated teams who develop detailed, client-specific processes for data inventory, data validation, QC or newly created workspaces, de-duplication, and multi-step sign-off procedures prior to decommission
- Experience handling unique data types or formats, concurrent migration of multiple workspaces, and complex data mapping
- Work in tandem with you to develop a comprehensive migration plan, along with identification and discussion of consideration, challenges, and best practices

Predictable pricing structures

- Routinely implement broad range of value-based fee structures that deliver cost efficiencies and budget predictability
- Data services traditionally priced on per GB basis with tiered discounts based on volume and budget
- Clear hourly fees are established for technical and project management consulting services
- Cases with special attributes may implement capped or flat fees for various stages of work

Why Nelson Mullins Encompass?

- Scalable solutions tailored for your needs
- Secure infrastructure and data handling processes
- Predictable fee structures to fit your budget
- Experienced professionals to work in tandem with your team
